PROFESSIONAL EXPERIENCE

LEAD ENGINEER

05/2018 to CURRENT

Lambda School | San Francisco, CA

- I help create the sprint backlog and divvy up tasks for a scrum team of 8 engineers using modern agile development
- Push tested and well documented production code in fast release cycles. **(React/LESS/NodeJS)**
- I hold daily standup meetings and do frequent peer code reviews throughout the week

PROJECTS

To see full description please visit <https://bradleyball.dev/portfolios>
Designhub

- This is a platform my team and I made for Lambda School students in the web design cohort. This helped us centralize student projects, to make it easier for the teachers to grade. Think github for web designers. See <https://www.youtube.com/watch?v=PTBgNKuqSsY> for presentation
- Github Frontend: <https://github.com/Lambda-School-Labs/designhub-fe>
- Github Backend: <https://github.com/Lambda-School-Labs/designhub-be>

Geopins

- Geopins is a social platform that enables you to set pins on locations you've been to, and share photos and experiences. I built this to share experiences with family and friends while working on my graphql skills
- Github: <https://github.com/cacheUp/map-app>

Ecommerce

- This is a full ecommerce site I built by myself to use the newest features of Nextjs
- Github: <https://github.com/cacheUp/shop>

SKILLS

- React (expert)
- Nodejs (expert)
- Redux (expert)
- React Hooks (expert)
- Context Api/useReducer Pattern (expert)
- CSS3/SASS/LESS (expert)
